PROJECTS

Issue Tracker — *Web Application*

Designed using MVC, productivity application, roles based security

https://trackerbarrel.up.railway.app/

Blog — *Web Application*

Fully featured blog platform, designed using MVC, original content

https://ontheblog-production.up.railway.app/

EXPERIENCE

Nightsound Studios, Carrboro, NC — *Audio Engineer*

Dec 2016 - May 2023

My responsibilities included maintaining client relationships, proficiency with vintage and state-of-the-art audio equipment, recording and mixing music and audiobooks, and working within a budget to achieve abstract goals.

Suspicious Figure, music production — *Recording Artist*

March 2023

I have released on major streaming platforms an album of original compositions for which I did the writing, arranging, producing, performing, and engineering. This can be found under the artist name, Suspicious Figure.

EDUCATION

Coder Foundry, Kernersville, NC
Full Stack Web Development

July 2023 - Sept 2023

I created several full-stack applications utilizing PostgreSQL databases, pushed to Github and published using Netlify and Railway. Applications include a productivity tracker, a blog platform, an address book, my portfolio webpage, and other coding exercises.

SKILLS

- C#, ASP.NET core, MVC
- HTML, CSS, Bootstrap
- JavaScript
- CI/CD with GitHub
- Publishing with Railway and Netlify
- PostgreSQL
